The New Jersey State Board of Dentistry has made a change to their continuing education requirements. For each biennial renewal period, ten of the forty credit hours for dentists are now to be completed as follows:

- 3 hours of cardiopulmonary resuscitation (CPR).
- 3 hours of pharmacology and internal medicine.
- 2 hours in preventing and controlling infectious diseases and managing personnel health and safety concerns related to infection control in dental settings.
- 1 hour in professional ethics and NJ law concerning the practice of dentistry.
- 1 hour in educational programs or topics concerning prescription opioid drugs.

See our courses that can fulfill the “State Board Required Courses.” These will be indicated with this tag: SBRC.

The Association for Continuing Dental Education (ACDE), including RSDM CDE and 34 other member schools, are jointly sponsoring a series of live webinars, featuring university-based key opinion leaders presenting on numerous topics to meet every dental professional's interests and schedule.
THE 4TH BIENNIAL SYMPOSIUM

FRIDAY, MAY 5, 2023
8:00 a.m. to 5:30 p.m.

Achievable Esthetics For Natural Teeth & Implants

In Memory of
Anthony R. Volpe, DMD

GERARD J. CHICHE, DDS
Preventing Esthetic Nightmares in Restorative Dentistry

BACH LE, DDS, MD, FICD, FACD
When Pink Esthetics is the Issue – Surgery or Prosthetics to the Rescue?

MICHAEL SONICK, DMD
Protocols for Sequencing Soft and Hard Grafting in the Esthetic Zone

JEFF BRUCIA, DDS
Materials: Strength versus Esthetics

COMPREHENSIVE TRAINING PROGRAM IN IMPLANT DENTISTRY

Rutgers School of Dental Medicine and The American Academy of Implant Dentistry

Course Director:
JACK PIERMATTI, DMD, FACP, FAAID
Assistant Clinical Professor, PG Prosthodontics
Department of Restorative Dentistry
Private Practice in Voorhees, NJ

Co-Director:
SHANKAR IYER, DDS, MDS
Clinical Assistant Professor
Departments of Restorative Dentistry and Periodontics
New York University, Department of Prosthodontics

Dates: Ten Friday to Sunday Modules
Beginning September 8, 2023
and ending June 2, 2024

Time: 8:00 a.m. to 5:00 p.m. each day

Location: Rutgers School of Dental Medicine

Tuition: For Dentists:
$16,275 – Register by August 15, 2023
$17,275 – Register after August 15, 2023
$5,000 initial deposit due on registration.
Contact us regarding a payment plan.

Credits: 300 participation credit hours

Code: 24D0240

This program has been designed to impart the understanding of diagnostic and treatment modalities necessary to properly treat patients who are candidates for dental implant therapy. The 300-hour interdisciplinary approach utilizes case-based learning methodology including lectures, demonstrations, interactive seminars, hands-on sessions, patient treatment, and relevant reviews of literature emphasizing evidence-based clinical approaches.

Objectives:
• Provide an intensive overview of state-of-the-art implant dentistry.
• Provide live surgical and prosthetic demonstrations on patients.
• Assess several Implant systems and their application.
• Preparation for the AAID Associate Fellow/Fellow Membership Examinations.
• Preparation for the written portion of the AAID Associate Fellow Membership Examination.

The MaxiCourse® Advantage
• 300+ hours of comprehensive lectures, live surgeries, demonstrations and hands-on sessions.
• Hands-on patient treatment under direct supervision.
  (Bring your own patients.)
• In-depth review of surgical and prosthetic protocols.
• Non-commercial course covering a wide spectrum of implant types and systems.
• Course satisfies educational requirement for Associate Fellowship in AAID.

The Rutgers School of Dental Medicine gratefully acknowledges a grant and technical support for this activity from: Nobel Biocare USA

Additional Speaker & Course Information is available on our Website:
cde.sdm.rutgers.edu/maxicourse
REGISTRATION CONFIRMATIONS are sent two weeks prior to the course date. Confirmation includes directions, parking information, room location, registration time, a receipt for tuition paid, etc.

We encourage early registration, as this helps to avoid unnecessary course cancellations. If you plan to register late, call to ensure space is available and to confirm logistical details.

Participants attending in-person must wear masks and may be screened upon entering building. Supplying proof of vaccination may also be needed. Please note, RSDM does not allow use of masks with an exhalation valve.

REGISTRATION FEE. Includes tuition, registration, handout materials, coffee breaks, lunch for most full-day courses, and other amenities involved in making this a pleasant learning experience. Residents and postdoctoral students must include a letter from their program director verifying status.

CANCELLATIONS & SUBSTITUTIONS. Cancellations received up to two working days before a course are refundable, minus a $35 registration service charge (unless otherwise noted in a course outline) – or you may apply the full registration fee toward a future course within the same academic year. After that, cancellations are subject to the entire registration fee.

SPECIAL NEEDS. RSDM complies with the Americans with Disabilities Act. If you require special services, facilities or dietary considerations (vegetarian or otherwise) to support your participation in this activity, please contact Sherri Wilson at 973-972-6561.

SUNSHINE ACT STATEMENT. In compliance with the Physicians Payment Sunshine Act, the Office of Continuing Dental Education may release participants’ names to applicable manufacturers who at times may provide an educational grant, in-kind and/or technical support for our programs.

PARTICIPANT CREDIT VERIFICATION. All participants are required to sign-in at the start of the course and following lunch. Credit letters will be provided at the End of the day and will not be mailed. Participants arriving late (one-half hour after course begins) or who may need to leave prior to completion will be asked to sign and note their arrival/departure times. Participants should complete the self-reporting section of their credit letters. CDE will adjust the database to reflect the actual number of hours received. The participant’s transcript will reflect actual credit hours if called upon by the State Board to verify attendance.

General Information

CREDIT: The Rutgers School of Dental Medicine (RSDM) is an approved course sponsor by the New Jersey State Board of Dentistry. Our courses, which deal with the scientific or clinical practice of dentistry, professional responsibilities, or ethical obligations of the profession, fulfill Board requirements for dentists’ license renewal. Credit hours are granted on an hour-for-hour basis, provided the course is completed as designed.

RSDM is an ADA CERP Recognized Provider; the current term of acceptance extends to 6/2025. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the CE provider or to ADA CERP at www.ada.org/cerp Rutgers is also an Academy of General Dentistry, approved national sponsor for FAGD/MAGD credit.

NOTE: Dental educational institutions are obligated to disseminate new knowledge related to dental practice. In so doing, some presentations may include controversial materials or commercial references. Sponsorship of a continuing dental education course by the Rutgers School of Dental Medicine does not necessarily imply endorsement of a particular philosophy, procedure, or product by this institution. Rutgers School of Dental Medicine reserves the right to modify course content, faculty and meeting locations; and also reserves the right to cancel a program, if necessary.

NOTE: The registered participant grants permission to the Office of Continuing Dental Education (and its designees and agents) to utilize the participant’s image, likeness, actions and/or statements in any live or recorded audio, video, or photographic display for exhibition, publication, or reproduction made of, about, or at an activity without further authorization or compensation.

The Rutgers School of Dental Medicine is a proud member of the Association for Continuing Dental Education. Founded in 1991, the ACDE provides a forum for cooperative, collaborative and mutual support among directors of university-based CDE programs. The ACDE mission is to provide high quality programs with superior educational value to dental care professionals.
FACULTY COURSES

Wednesday, March 8, 2023

Opiate Prescribing and Alternatives in Pain Management  
• KENNETH MARKOWITZ, DDS, BS  
12:30 to 1:30 p.m. / 1 credit hour  
ONLINE via ZOOM  
$49 All Registrants / Code: 23D0304-J08  
*Next Date: Monday, April 17, 2023 / 7:30 to 8:30 pm*

Wednesday, March 15, 2023

Persistent Post Treatment Pain: What Do I Do When Things Go Wrong?  
• GARY HEIR, DMD – Course Director  
10 a.m. to 5 p.m. / 6 credit hours  
$185 Dentists • $135 Aux./Res.  
Code: 23D0802

Wednesday, March 22, 2023

Occlusion – A Down-to-Earth Practical Course  
• STEVEN M. MORGANO, DMD, BA  
10 a.m. to 5 p.m. / 6 credit hours  
IN-PERSON AT RSDM  
$185 Dentists • $135 Aux./Res.  
Code: 23D0101

*SBRC Can be taken to fulfill the required “State Board Required Courses.”*

**Restore or Replace a Tooth Root? Foundation Restorations for Endodontically-Treated Teeth**

Participants will understand how to:
- Maintain gingival architecture when transitioning from teeth to implants.
- Influence gingival architecture with restorative materials.
- Record sub-gingival tissues for laboratory communication.
- Predict the likelihood of an esthetically pleasing outcome.
- Weight the cost vs. benefit of salvaging questionable teeth.
- Restore endodontically treated teeth with confidence.
- Understand the factors that influence prognosis of an endodontically treated tooth.
- Choose a post system and technique for endodontically treated teeth.

Presented by:  
LOUIS DIPEDE DMD, FACP

**Education:** DMD, Rutgers School of Dental Medicine, Newark, NJ. Specialized in: Advanced prosthodontics and maxillofacial prosthetics.

**Training:** Fellowship, Maxillofacial Prosthetics and Dental Oncology, Memorial Sloan Kettering Cancer Center, New York, NY. Certificate in Advanced Prosthodontics, University of California, Los Angeles (UCLA).

**Memberships:** American College of Prosthodontists. New York Academy of Prosthodontics. International Society for Maxillofacial Rehabilitation.

**Friday, March 17, 2023**  
9:00 a.m. to 1:00 p.m. / 4 credit hours

Annual OSHA Training & Infection Control – Are We Safe “Enough”?

Safety training linking policy to practice:
Recommended for Infection Control Coordinators (ICC)
and the whole safety team.

Combined 2-hour Program Contents:
(See our website for further information)
- Safety strategies.
- Physical safety & hazard communications.
- Sharps & waste safety.
- Instrument sterilization.
- Standard vs. Transmission-based precautions.
- Hierarchy of safety efforts: most to least effective practices.
- Screening patients.
- Building & clinic aerosol control: Indoor air quality.
- Hand hygiene.
- Environmental asepsis and dental waterlines.
- PPE criteria, use, and limitations.
- Reflection on improving dental safety preparedness.
- Resources: CDC, WHO, ADA, OSAP, AGD, FDA, OSHA.

Presented by:
NANCY DEWHIRST, RDH, BS
Ms. Dewhirst graduated from the University of Southern California, practiced dental hygiene for 20 years, is an adjunct dental hygiene faculty at West Coast University, and a member of Sigma Phi Alpha. She is Editor in Chief of OSAP’s ICIP newsletter and has had numerous articles published. She is consistently listed as one of the nation’s “Leaders in CE,” and presents over 100 seminars a year at major U.S. and Canadian Dental Conferences.

ONLINE through Rutgers School of Dental Medicine

Attend Both Dates (2 credit hours total)
$69 All Registrants / Code: 23D0205
Simplifying Posterior Composite Restorations –
Bulk Fill and Bio Active Materials
– Hands-On Workshop –

In this lecture/hands-on course, Dr. Lowe will discuss and demonstrate techniques to create morphologically precise direct posterior composite restorations. An emphasis will be placed on the use bulk fill materials, including flowable resins, to help decrease layering in simplify posterior composite placement. Bioactive “smart” materials also offer an interesting restorative option. Learn when and where the use of these materials is indicated. Today’s composite restorative materials in combination with finishing techniques will enable simple, yet “world class” placement of state-of-the-art restorations for your patients tomorrow!

Objectives:

- Discuss bulk fill restorative alternatives and their use.
- Learn where bio active materials can help in the restorative process.
- Discuss how sectional matrix can accurately reproduce contact and contour for proximal surfaces.
- Learn techniques to manage soft tissues when placing composite resins.
- Finishing and polishing techniques that create natural surface texture and reflection.

You will learn hands-on:

- How to construct a direct glass fiber bridge with composite materials.
- How to use sectional matrix posteriorly and anatomic anterior matrices to create contour, contact, and anatomic detail using direct restorative and bioactive restorative technologies.

---

Guest Speaker:

ROBERT A. LOWE, DDS, FAGD, FICD, FADI, FACD
Diplomate, American Board of Aesthetic Dentistry

Education: DDS, magna cum laude, from Loyola University School of Dentistry, where he taught Restorative and Rehabilitative Dentistry.
Training: Residency in Restorative and Rehabilitative Dentistry, Aesthetic Dentistry, Periodontics, Prosthodontics, Sedation Dentistry. Rotation in Surgical Anesthesia.
Experience: Full-time private practice for 30+ years. Authored and published articles in respected dental publications and dental textbooks. He is a founding member of the World Clinical Laser Institute.

CONTINUING DENTAL EDUCATION CALENDAR

Survey of Current Updates in Dental Ethics and the Law

Presented by:
KEVIN B. EARLE, MBA, MPH

This course fulfills a NJ State Board of Dentistry requirement for continuing education.

To keep New Jersey Dentists abreast of the latest developments on the regulatory front and in the ADA Code of Professional Conduct, this one-hour program will cover:

- Newly passed legislation permitting dentists to administer HPV and flu vaccinations, the status of rulemaking by the Board of Dentistry, and the emergency authorization for dentists to administer COVID vaccinations.
- A discussion about the White Paper on the Ethics of Vaccination issued by the ADA Council on Ethics, Bylaws and Judicial Affairs.
- HIPAA considerations on requesting COVID-19 vaccination status of patients and employees.
- New Board regulations on training and limitations on the use of injectable pharmacologics (like Botox™).
- New laws and Board regulations on telemedicine and telehealth.
- New Board regulations on anesthesia and sedation.
- New requirements for all dentists to have AEDs, positive pressure oxygen and CPR/ACLS training.

For additional course and speaker information visit our website @ cde.sdm.rutgers.edu

FACULTY COURSES

Wednesday, April 19, 2023
ENDO 101 & 102
Tomorrow’s Endodontics Today – An Evidenced Based Approach
- NOAH CHIVIAN, DDS, FACD, FICD

SBRC
Update on Aesthetic & Restorative Materials; Practical Tips for Lifelike Results

New materials in dentistry and excellent chairside communication can help to differentiate and grow your dental practice. In this technique-filled seminar, the clinician will teach you skills you can use to refine your restorations to a level of consistent quality and bring your case presentations to a new level.

Learn:

- To use some of the latest composite and other materials to save time and create excellent clinical outcomes.
- To refine techniques to create excellent master impressions and have successful cementation of all types of aesthetic materials.
- A consultative approach to case presentation that can help patients say “Yes” and improve the bottom line of your practice.
- Basic concepts of aesthetics and dental illusions to achieve lifelike results.

Presented by:
MARVIN A. FIER, DDS, FASDA, ABAD
Cosmetic, Family, Implant Dentistry

Associate Clinical Professor, Touro College of Dental Medicine
Executive VP, American Society for Dental Aesthetics

Advisory Boards: Dentistry Today & Reality
Fellow: American & Int’l College of Dentists
Diplomate, American Board of Aesthetic Dentistry

Wednesday, April 26, 2023
9:00 a.m. to 5:00 p.m. / 7 credit hours

Achievable Esthetics for Natural Teeth and Implants

In Memory of
Anthony R. Volpe, DMD

Preventing Esthetic Nightmares in Restorative Dentistry

Presented by:
GERARD J. CHICHE, DDS
Diplomate American Board of Forensic Odontology / Augusta, Georgia

This presentation will discuss the treatment plan, restorative management and risk factors control in a step-by-step method in order to resolve significant esthetic problems restoring the esthetic zone up to full mouth esthetic rehabilitations. The management of wear and setting the Vertical Dimension of occlusion will also be a focus of the treatment plan process.

When Pink Esthetics is the Issue – Surgery or Prosthetic to the Rescue?

Presented by:
BACH LE, DDS, MD, FICD, FACD / Whittier, CA

Many patients with missing teeth in the “esthetic zone” present to us with less-than-ideal alveolar ridge form due to severe hard and soft tissue loss. While many techniques offer excellent results for reconstruction of these defects, few can be said to guarantee success. A bone augmentation procedure to correct a vertical defect in the esthetic zone that is not fully successful in correcting the defect often ensures the use of prosthetic pink. This leads to the treatment dilemma: “If we have to use a little pink, why not use a lot of pink” and spare the patient the painful bone augmentation in the first place? The aim of this lecture is to critically evaluate the current evidence to determine the predictability of various bone augmentation techniques for vertical ridge defects for implant placement and when to consider more conservative alternative treatment options. A series of cases have been gathered to illustrate risk assessment and predictable management of various critical size defects ranging from moderate to severe defects.

Objectives:

- Describe the anatomic basis and principles of vertical hard tissue grafting for implant site development.
- Describe a simple diagnostic parameter to assess the risks involved in the treatment of each individual patient.
- Apply practical methods of handling the vertically deficient ridge.

The Rutgers School of Dental Medicine gratefully acknowledges an educational grant for this activity from:

Colgate-Palmolive

Call to Register: 973-972-6561 or 1-866-720-1971
Is There Really a Proper Sequence for Soft and Hard Grafting in the Esthetic Zone?

Presented by:

MICHAEL SONICK, DMD
Diplomate American Board of Forensic Odontology / Fairfield, CT

Confusion abounds as to the proper treatment sequence of dental implant care. How can and should predictable biologic and esthetic success be achieved? Should bone be regenerated prior to, at the time of implant placement or both? When should soft tissue augmentation be attempted so that predictability is not a roll of the dice?

The importance of site preparation prior to, at the time of, and at implant placement will be demonstrated. Soft tissue procedures to assure optimal esthetic reconstruction before implant placement, at implant placement, at second stage surgery and post second stage surgery will also be shown.

Learning Objectives:
• Sequence of extraction, implant placement and bone grafting.
• Types of bone grafts and when to use.
• Predictable use of membranes and growth factors in regeneration.
• Understand the timing and multiplicity of techniques for soft tissue regeneration.

Overcoming Clinical Challenges in a Restorative Dental Practice
Using Techniques to Master the Adhesive Interface

Presented by:

JEFF J. BRUCIA, DDS /San Francisco, CA

Balancing a busy day in private practice with the many varied materials and techniques we are all exposed to can be confusing, frustrating, and overwhelming. Accurate diagnosis, proper materials selection and great clinical skills are critical for managing teeth with failing restorations, deep caries, and tooth cracks. Minimal invasive procedures have proven to provide predictable and long-lasting result when the best techniques are applied. This fast-paced lecture will use science to support the step-by-step clinical presentations of several cases. Advanced restorative and adhesive concepts will be introduced.

Learning Objectives:
• Advanced concepts for the indirect adhesive interface.
• Minimally invasive concepts for the cracked tooth.
• Predictable use of membranes and growth factors in regeneration.
• Conservative prep design for predictable results.
Restorative Aspects of Dental Implants

This presentation is a part of the Rutgers School of Dental Medicine and AAID MaxiCourse®, and is open to all dentists for this day.

Many common issues will be discussed with an emphasis on restorative aspects of dental implants:

- Why there are problems with both cementation as well as screw retained prosthesis.
- Both can lead to implant loss and reducing the risks of failure will be shown.
- Implant health metrics – how does a clinician know the implant is well, ailing, or failing – the pitfalls of relying on radiography. Probing around dental implants – should it be done?
- Components and materials – what should you be using to optimize the implant restoration.

Presented by:
CHANDUR WADHWANI, BDS, MSD
Bellevue, WA

Dr. Chandur Wadhwani is a full-time clinician in private practice limited to Prosthodontics. He holds adjunct faculty positions as assistant professor in Prosthodontics at the University of Washington and Loma Linda University. He also has an associate professor position at Oregon Health Science University in periodontics.

He has written over 100 peer reviewed articles and contributed to seven textbooks on implants. He was awarded the Prestigious Distinguished Lecturer Award from the American College of prosthodontics in 2018 and has awards from the Academy of Osteointegration. His research focus within the field of dental implants covers: cementation, screw failure, radiography, probing and decontamination of components.

Saturday, April 29, 2023
8:00 a.m. to 5:00 p.m. / 6 credit hours
IN-PERSON at Rutgers School of Dental Medicine
$235 Dentists / Code: 23D0212
Real World Endo™ – “The Institute Course” is an intense course that covers a broad spectrum of topics. We will demystify endodontics, covering everything from logical diagnosis to hydraulic condensation. Our approach is entirely practical, and this is an all-inclusive course for the general practitioner that includes significant hands-on instruction. We will also address the issue of “endo versus implant” from the perspective of an experienced endodontist who is also board certified in implant placement (Dr. Gatti). This timely discussion will be comprehensive although there is not a specific hands-on component for dental implants.

Focus will be on combining the latest technology with long standing evidence based endodontic principles. The goal is to have you move safely from endodontics to final tooth restoration. Great emphasis will be placed on hands-on sessions.

Endodontic strategies and techniques developed over years of clinical practice will be shared with you. Whether it is creating proper straight-line access or using the new “Blend Technique” to achieve predictable shaping results, or it’s learning how to place non-destructive posts, you will have the opportunity to practice these techniques in the lab.

You will learn how to:
- Differentiate between an endodontic case and placement of a dental implant.
- Routinely anesthetize “Hot Teeth” effectively.
- Visualize and create the “Ideal Access” preparation.
- Fully understand “Crown-Down” philosophy.
- Appreciate and perform new “Blend Technique” of rotary instrumentation.
- Make correct decision in cases of endodontics or implantology.
- Fill root canals using a bioceramic technique and hydraulic condensation.
- Perform predictable pulp caps and pulpotomies using bioceramic putty.
- Effectively use ultrasonic technology in your endodontics.
- Easily use enhanced magnification and light in your clinical setting.

Guest Speaker:
ANNE L. KOCH, DMD
Palm Beach Gardens, FL

DR. ANNE KOCH received her DMD and Certificate in Endodontics from the Univ. of Pennsylvania. She is the founder and past Director of the Postdoctoral Program in Endodontics and Microsurgery at Harvard School of Dental Medicine. She maintains a faculty position at PENN, Dept. of Endodontics, and serves as a Senior Fellow with Penn Medicine. She also is a member of the Board of Overseers for the Univ. of Pennsylvania, School of Dental Medicine. Dr. Koch is the holder of multiple patents, the author of 150+ articles, and has presented 1,000+ lectures worldwide.

Guest Speaker:
JOHN GATTI, DDS, MMSc
Kansas City, MO

DR. JOHN GATTI received his Master’s in Medical Sciences and Certificate in Endodontics from the Harvard School of Dental Medicine. He received a certificate in Endodontic Surgery from the University of Graz-Austria. His DDS from the Univ. of Missouri-practices in Kansas City and St. Louis. Dr. Gatti is also an accomplished dental implantologist and a Board-Certified Diplomate of the International Congress of Oral Implantologists.

LIMITED ENROLLMENT
Saturday & Sunday, June 3 & 4, 2023
9 am. to 5 p.m. each day / 14 participation credit hours
at Rutgers School of Dental Medicine
$1,745 Dentists – by 5/1/2023 (early registration discount)
$1,845 Dentists – after 5/1/2023
Code: 23D0220-M03

CANCELLATIONS & SUBSTITUTIONS. Cancellations received up to three working days before a course are refundable, minus a $100 registration service charge, or you may apply the full registration fee toward a future course within the same academic year (our academic year runs from September through June). After the deadline, cancellations are subject to the entire course tuition.

Managing Acute Dental Pain – Responsible Opioid Prescribing, Medical Evaluation, and Pharmacology for the Dental Office

This interactive and clinically oriented course will include protocols to evaluate and manage:

- The opioid crisis as it relates to the dental practice (2-hours).
- The medically complex dental patient with pharmacological considerations of systemic and peri-operative medications (4-hours).
- Select medical urgency and emergencies that can occur in the dental office (2-hours).

Topics to be covered are:

- Effective use of analgesics and antibiotics to improve treatment outcomes.
- Dental management of the diabetic patient.
- Management of patients taking anti-coagulant, anti-thrombotic, or anti-platelet agents.
- Responsible opioid prescribing, and protocols for managing medical urgencies and emergencies in the dental office.

This course is designed to meet dental re-licensure requirements for:

- Pain management and practices of prescribing or dispensing of opioids.
- Medical evaluation.
- Pharmacology for the dental practice.

At the completion of the course, you will be able to:

- Render dental treatment that is safe, effective, and pharmacologically integrated.
- Effectively prescribe analgesics (including opioids) and antibiotics.
- Manage the diabetic patient in the dental office.
- Manage dental patients taking anti-coagulant, anti-thrombotic, or anti-platelet agents.
- Understand the extent and nature of the opioid crisis.
- Identify patients who may be seeking out your practice to satisfy their opioid addiction.
- Learn what government regulatory agencies require clinicians to do when prescribing opioid medications.
- Understand how to manage select medical urgencies and emergencies.

Guest Speaker:

JAMES L. RUTKOWSKI, DMD, PhD

Dr. Rutkowski is a Dentist, with a PhD in Pharmacology. He has authored multiple publications in peer-reviewed journals and textbook chapters. He is Editor-in-Chief of the Journal of Oral Implantology, a Diplomate/Past-President of the American Board of Oral Implantology/Implant Dentistry (ABO/ID) and Honored Fellow of the American Academy of Implant Dentistry (AAID). He lectures nationally and internationally on medical evaluations, pharmacology, sedation techniques, bone grafting materials and techniques, plus methods for treating medically compromised dental patients. Dr. Rutkowski has been bestowed the Gershkoff-Goldberg Award for service to the field of Implant Dentistry and the Isaih Lew Memorial Research Award for contributions to research in the field of Implant Dentistry.

Unless otherwise noted, course are held at the Rutgers School of Dental Medicine in Newark, NJ.
Incorporating Dental Sleep Medicine into the Dental Practice

The ADA has now recognized that the dental office is the front line in awareness of obstructive sleep apnea. A rapidly growing area of dental sleep medicine and the dentist’s roll in treating this deadly disease will be discussed. This will include the most effective way for the dental team to screen their patients for obstructive sleep apnea.

This informative session will also cover various dental appliances and how to adjust each one to get the most benefit for the patient. The later part of the lecture will entail the various ways to incorporate dental sleep medicine into your practice. This would include the tools for billing and marketing so your practice can implement the start of dental sleep medicine on Monday morning.

Learning Objectives:

• Recognizing the signs and symptoms of obstructive sleep apnea.
• Communication with sleep clinicians and getting their corporation to help you achieve success.
• Understanding various dental appliances in treating sleep apnea and how they are titrated.
• A successful way to implement and grow dental sleep medicine in your practice.

MaxiCourse®
PRACTICAL IMPLANT EDUCATION

A Comprehensive Hands-on Training Program
IN IMPLANT DENTISTRY

September 2022– June 2023

Ten Friday to Sunday Modules
8:00 a.m. to 5:00 p.m. each day
At the Rutgers School of Dental Medicine

Tuition: $16,275 – Register by August 15, 2023
$17,275 – Register after August 15, 2023

This program has been designed to impart the understanding of diagnostic and treatment modalities necessary to properly treat patients who are candidates for dental implant therapy. The 300-hour interdisciplinary approach utilizes case-based learning methodology including lectures, demonstrations, interactive seminars, hands-on sessions, patient treatment, and relevant reviews of literature emphasizing evidence-based clinical approaches.
