The New Jersey Board of Dentistry requirement for each biennial renewal period, ten of the forty credit hours for dentists, must be completed as follows:

- 3 hours of cardiopulmonary resuscitation (CPR).
- 3 hours of pharmacology and internal medicine.
- 2 hours of infection control in dental settings.
- 1 hour in professional ethics and NJ law concerning the practice of dentistry.
- 1 hour in educational program concerning prescription opioid drugs.

See page 16 for more details.

Our courses that can fulfill these requirements will be indicated with this tag: **SBRC**

**NEW** U.S. Drug Enforcement Administration (DEA) issued guidance outlining requirements for a one-time, eight-hour training on “treatment and management of patients with opioid or other substance use disorders.” The Medication Access and Training Expansion (MATE) Act passed as part of the Consolidated Appropriations Act of 2023, requires all DEA registered providers to complete this training.

Our courses that can fulfill both State Board and DEA MATE requirements will be indicated by this tag: **SBRC/DEA MATE**

---

**FALL 2023 CDE COURSES**

FOR DENTISTS AND DENTAL TEAM MEMBERS
14th Annual

September 2023 – June 2024

Rutgers School of Dental Medicine and The American Academy of Implant Dentistry

A Comprehensive Hands-On Training Program in Implant Dentistry

The MaxiCourse® Advantage

- 300+ hours of comprehensive lectures, live surgeries, demonstrations and hands-on sessions.
- Hands-on patient treatment under direct supervision. (*Bring your own patients.*)
- In-depth review of surgical and prosthetic protocols.
- Non-commercial course covering a wide spectrum of implant types and systems.
- Course satisfies educational requirement for Associate Fellowship in AAID.

Program Directors

JACK PIERMATTI, DMD, FACP, FAAID
Clinical Assistant Professor, PG Prosthodontics
Department of Restorative Dentistry
Private Practice in Voorhees, NJ

SHANKAR IYER, DDS, MDS
Clinical Assistant Professor
Departments of Restorative Dentistry and Periodontics
Private Practice in Elizabeth, NJ

Program Information

Dates: Ten Friday to Sunday Modules
Beginning September 8, 2023 and
Ending June 2, 2024

Time: 8:00 a.m to 5:00 p.m. each day

Location: Rutgers School of Dental Medicine in Newark, NJ

Tuition: $16,275 – Register by August 15, 2023
$17,275 – Register after August 15, 2023

Credits: 300 participation credit hours

This program has been designed to impart the understanding of diagnostic and treatment modalities necessary to properly treat patients who are candidates for dental implant therapy. The 300-hour interdisciplinary approach utilizes case-based learning methodology including lectures, demonstrations, interactive seminars, hands-on sessions, patient treatment, and relevant reviews of literature emphasizing evidence-based clinical approaches.

</table>
REGISTRATION CONFIRMATIONS
are sent two weeks
prior to the course date.
Confirmation includes
directions, parking information,
room location, registration time,
a receipt for tuition paid, etc.
We encourage early
registration, as this helps to
avoid unnecessary course
cancellations.
If you plan to register late,
call to ensure space is available
and to confirm logistical details.
Residents and postdoctoral
students must include a letter
from their program director
verifying status.

REGISTRATION FEE. Includes tuition, registration, handout materials, coffee breaks, lunch for most full-day courses,
and other amenities involved in making this a pleasant learning experience. Residents and postdoctoral students
must include a letter from their program director verifying status.

CANCELLATIONS & SUBSTITUTIONS. Cancellations received up to two working days before a course are refundable,
minus a $35 registration service charge (unless otherwise noted in a course outline) – or you may apply the full
registration fee toward a future course within the same academic year. After that, cancellations are subject to the
entire registration fee.

SPECIAL NEEDS. RSDM complies with the Americans with Disabilities Act. If you require special services, facilities
or dietary considerations (vegetarian or otherwise) to support your participation in this activity, please contact
Sherri Wilson at 973-972-6561.

SUNSHINE ACT STATEMENT. In compliance with the Physicians Payment Sunshine Act, the Office of Continuing
Dental Education may release participants’ names to applicable manufacturers who at times may provide an
educational grant, in-kind and/or technical support for our programs.

PARTICIPANT CREDIT VERIFICATION. All participants are required to sign-in at the start of the course and following
lunch. Credit letters will be provided at the End of the day and will not be mailed. Participants arriving late (one-half
hour after course begins) or who may need to leave prior to completion will be asked to sign and note their arrival/departure
times. Participants should complete the self-reporting section of their credit letters. CDE will adjust the
database to reflect the actual number of hours received. The participant’s transcript will reflect actual credit hours
if called upon by the State Board to verify attendance.

General Information

CREDIT: The Rutgers School of Dental Medicine (RSDM) is an approved course sponsor by the New Jersey Board of
Dentistry. Our courses, which deal with the scientific or clinical practice of dentistry, professional responsibilities, or ethical
obligations of the profession, fulfill Board requirements for dentists’ license renewal. Credit hours are granted on an hour-
for-hour basis, provided the course is completed as designed.

RSDM is an ADA CERP Recognized Provider; the current term of acceptance extends to 6/2025. ADA CERP is a service of the
American Dental Association to assist dental professionals in identifying quality providers of continuing dental education.
ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by
boards of dentistry. Concerns or complaints about a CE provider may be directed to the CE provider or to ADA CERP at
www.ada.org/cerp Rutgers is also an Academy of General Dentistry, approved national sponsor for FAGD/MAGD credit.

NOTE: Dental educational institutions are obligated to disseminate new knowledge related to dental practice. In so doing,
some presentations may include controversial materials or commercial references. Sponsorship of a continuing dental
education course by the Rutgers School of Dental Medicine does not necessarily imply endorsement of a particular philosophy,
procedure, or product by this institution. Rutgers School of Dental Medicine reserves the right to modify course content,
and other amenities involved in making this a pleasant learning experience. Residents and postdoctoral students
must include a letter from their program director verifying status.

NOTE: The registered participant grants permission to the Office of Continuing Dental Education (and its designees and agents)
to utilize the participant’s image, likeness, actions and/or statements in any live or recorded audio, video, or photographic display
for exhibition, publication, or reproduction made of, about, or at an activity without further authorization or compensation.

The Rutgers School of Dental Medicine is a proud member of the Association for Continuing Dental Education.
Founded in 1991, the ACDE provides a forum for cooperative, collaborative and mutual support among directors of university-based CDE programs.
The ACDE mission is to provide high quality programs with superior educational value to dental care professionals.

Call to Register: 973-972-6561 or 1-866-720-1971
Manifestations of Systemic Disease in the Orofacial Region

The relationship between oral and systemic health is multifaceted and reciprocal. Many systemic conditions may manifest in the oral cavity—sometimes prior to their diagnosis. While systemic disease or its therapy may adversely affect oral health, oral disease may also negatively impact systemic health and quality of life. By virtue of their training, oral health practitioners are familiar with the plethora of oral abnormalities that may result from or predispose patients to systemic illness.

Dental professionals are uniquely positioned to monitor disease control and adherence to therapy in patients diagnosed with systemic disease, to utilize salivary diagnostics and other evidence-based methodologies to identify those at risk for oral or systemic illness and to initiate appropriate referrals. This interactive, case-based presentation highlights new horizons for dentistry as a primary care discipline with significant potential for contribution to public health.

You will learn about:
- Orofacial manifestations of systemic disease or its therapy (e.g., hereditary, hematologic, infectious, endocrinopathic, immune-mediated, dermatologic, granulomatous, cardiovascular, pulmonary, and metastatic conditions.)
- The potential impact of these manifestations on dental care.
- Systemic implications of oral disease or its therapy.
- Screening for medical conditions in a dental setting.
- Role of emerging salivary diagnostics in dentistry.
- Medicolegal implications.

Survey of Current Updates in Dental Ethics and the Law (SBRC)

Presented by:
KEVIN B. EARLE, MBA, MPH

To keep New Jersey Dentists abreast of the latest developments on the regulatory front and in the ADA Code of Professional Conduct, this course will cover:
- Newly passed legislation permitting dentists to administer HPV and flu vaccinations, the status of rulemaking by the Board of Dentistry, and the emergency authorization for dentists to administer COVID vaccinations.
- A discussion about the White Paper on the Ethics of Vaccination issued by the ADA Council on Ethics, Bylaws and Judicial Affairs.
- HIPAA considerations on requesting COVID-19 vaccination status of patients and employees.
- New Board regulations on training and limitations on the use of injectable pharmacologics (like Botox™).
- New laws and Board regulations on telemedicine and telehealth.
- New Board regulations on anesthesia and sedation.
- New requirements for all dentists to have AEDs, positive pressure oxygen and CPR/ACLS training.

Additional information is available on our website: cde.sdm.rutgers.edu

Two dates to choose from:

Wednesday, September 20, 2023
1 to 2 p.m. / 1 credit hour

Hot Topics in Infection Control – and Some Cool Tips!
(SBRC)

Update and review the most important clinical safety issues since COVID-19 fundamentally changed dental infection control. This class gives you a “Hit List” of the hottest safety topics and the most important things to do! Optimize the most effective strategies to apply laws and guidelines that manage safety challenges, including bloodborne, droplet, contact and aerosol transmitted diseases (ATD’s). Get some cool tips for these hot topics!

Learning Objectives:
• Prioritize safety strategies that are the most effective.
• Update standards for bloodborne, contact, droplet, and airborne diseases.
• Manage special challenges such as biofilms and related health concerns.

Tuesday, September 12, 2023
8 p.m. to 10 p.m. / 2 credit hours
ONLINE through Rutgers School of Dental Medicine
$69 All Registrants / Code: 24D0202

Presented by:
NANCY DEWHIRST,RDH, BS

Ms. Dewhirst graduated from the University of Southern California, practiced dental hygiene for 20 years, is an adjunct dental hygiene faculty at West Coast University, and a member of Sigma Phi Alpha. She is Editor in Chief of OSAP’s ICIP newsletter and has numerous articles published. She is consistently listed as one of the nation’s “Leaders in CE,” and presents over 100 seminars a year at major U.S. and Canadian Dental Conferences.

See our website for more details: cde.sdm.rutgers.edu

Friday, October 27, 2023
ONE DAY / TWO TOPICS
Annual OSHA Training & Infection Control – Are We Safe “Enough”? – PLUS – Ergonomics: It’s A Balancing Act (SBRC)

We will review the science of disease transmission and updates and make sense of the many dental safety recommendations considering bloodborne pathogens, COVID-19 and beyond. Standard and Transmission-based Precautions will be explained in the context of CDC & ADA Guidelines and OSHA & Dental Board regulations (meets Infection Control & OSHA CE requirements). Safety tips are categorized by effectiveness and include new technology, how to optimize indoor air safety, PPE, and other prevention controls.

Upon completion, you should be able to:
• Recognize and manage bloodborne, contact, droplet, and airborne diseases.
• Identify best practices for providing dental care while consider
• Make sense of evolving recommendations as applied to changing infection risk.

Ergonomics: It’s A Balancing Act (3-hours participation)
Wear comfortable clothes for stretching!

Enjoy a long dental career and improve clinical precision while avoiding injury and pain! Pathogenesis, causes and prevention of various cumulative trauma disorders are discussed, focusing on upper extremity, spinal and joint pathologies. Evaluate preventive strategies, including equipment design, body positioning and conditioning and enhanced visualization. Practice stretching and strengthening exercises to reduce pain, preserve range of motion and optimize personal career excellence and longevity.

DENTURE CONVERSIONS...THE SMART WAY
– Hands-on Workshop –

This course introduces the novel “Separable Fastener” and it’s use in creating full arch fixed prostheses in 20-30 minutes. Attendees will learn the rationale for the creation of the “separable fastener” and the workflow that separable fasteners allow. Attendees will see simultaneously a denture conversion in real time during the presentation. This course demonstrates the novel workflow for full arch fixed provisionals from pick-up to delivery.

**Course Objectives:**
- Review principles of fixed complete dentures (e.g., implant positioning, abutment selection, immediate load provisional, definitive restoration.)
- Hands-on practice to establish hygienic contours in the immediate load prosthesis.
- Hands-on training for pick-up of temporary cylinders into denture and conversion into fixed complete denture.
- Hands-on training for using separable fasteners in the denture conversion procedure.
- Hands-on training for use of separable fasteners for prosthesis repairs or implant revisions.

Guest Speaker:
BRADFORD KOFFORD, DMD, MS, FACP

DR. BRADFORD KOFFORD is a 2008 graduate of Case Western Reserve University School of Dental Medicine. He completed his Prosthodontics residency with the United States Air Force (USAF) at Lackland Air Force Base Wilford Hall Medical Center MacKown Dental Clinic in 2011 as well as his master’s degree in Biology from the University of Texas Health Sciences Center at San Antonio. He served 6 years with the USAF and achieved the rank of Major. He has been in private practice in Cary, North Carolina since 2014. He is a partner in 7 dental practices and a full-service dental laboratory.

CONTINUING DENTAL EDUCATION CALENDAR

SUBSTANCE USE DISORDERS TRAINING (DEA MATE & SBRC)

This course is designed to meet the new DEA MATE initial or renewal registration requirements.

This hybrid course with on-site (6.5 hours) and self-paced (1.5 hours reading assignment) is structured to satisfy the new DEA requirement for any practitioner with a DEA license or new applicants for the same. The objective for this new DEA requirement, as per the DEA website, is to “promote understanding of SUDs as well as their identification, treatment and management.” This went into effect on June 27, 2023.

Topics to be covered include, but not limited to:

- Neuroanatomy and neurophysiology of pain, substance abuse and addiction: pain pathways, pain mechanisms; neurons; receptors; types of pain.
- Substance abuse and addiction: terminology, definitions; drugs of abuse and addiction; identifying the risk factors; and who is prone?
- Epidemiology of SUD and addiction: Global, US, state, and local; age, gender, race, geographic predilection, and others.
- Evaluating analgesic studies and the Opioid Analgesic Reduction Study (OARS study.)
- Principles of sound pain management: safe pharmacological management of dental pain; acute and chronic pain.
- Neurophysiology and pharmacology of substance abuse and addiction: neurotransmitters; reward pathways; brain centers of substance use and addiction.
- Pharmacologic management of substance use disorder: medications and regimens commonly used for SUD: opioids, alcohol, tobacco, others. Reversal agents.
- Referral: who, when, to whom? Follow up and what to avoid in a de-addicted person.

READING ASSIGNMENT:

Literature review (self-study.) Upon registration, a pdf of 8-10 articles will be emailed for home study/reading. This portion is worth 1.5 credit hours.

At the completion of the course, you will be able to:

- Understand the basics of pain physiology, mechanisms, and principles of sound pain management.
- Learn to identify patients with the potential for substance use disorders and prevention of SUD.
- Learn safe pharmacological management of dental pain.
- Understand the basics of pharmacology of the treatment of SUDs.
- Know the fundamentals of reversal agents, de-addiction, and rehabilitation.
- Learn how and when to refer these patients and to whom.

Creating Predictable and Excellent Endodontics

If your goal is to attend a presentation packed with simple, efficient, and clinically relevant information for immediate integration into your day-to-day workflow, this lecture is designed with you in mind. The program is full of what-you-need-to-know pearls regarding the latest concepts, techniques, and technologies in performing predictable and high-quality endodontic treatment. Technique animations and clinical video/DVD-clips illustrating diagnosis procedures, safe and efficient access, glide path management, optimum shaping, hydrodynamic disinfection, and obturation of root canal systems in three dimensions will be shown to hopefully take effective clinicians into a level of higher performance and personal satisfaction.

OBJECTIVES – here is what you will learn:

• Importance of establishing accurate diagnoses via reliable pulp testing techniques and CBCT.

• Effectively achieve straight line access and avoid separating instruments.

• Appreciation of the power and versatility of operating microscopes.

• Strategies that maximize negotiating root canals to length while avoiding blockages.

• Understanding of the importance of owning the glide path for rotary/reciprocation files to follow in order to optimally shape canals.

• Reliable management of working length determination and rationale for apical and lateral patency.

• Efficiency and safety of the single file shaping technique.

• Efficient use and logical sequence of intracanal irrigants and chelating agents.

• Effective hydrodynamic disinfection of the root canal system.

• Advantages of the pre-enlargement technique, thermosoftened obturation, and sealer hydraulics during 3-D compaction.

Guest Speaker:

MICHAEL J. RIBERA, DMD, MS
Diplomate of the American Board of Endodontics

Dr. Michael Ribera is a 1984 graduate of Boston College and a 1989 graduate of Harvard School of Dental Medicine. In 1990, he completed a general practice residency at Harvard's Brigham and Women's Hospital, and in 1992 received his Certificate in Endodontics and Master of Science Degree from Northwestern University Dental School in Chicago.

Dr. Ribera is a member of the District of Columbia Dental Society, a specialist member of the American Association of Endodontists, a Diplomate of the American Board of Endodontics, and a member of the Endodontic College of Diplomates. He is the 2006 recipient of the District of Columbia Dental Society’s David Mast Award for excellence in continuing education. Dr. Ribera is fluent in Spanish, French and Italian.

Opiate Prescribing and Alternatives in Pain Management  
(DEA MATE & SBRC)

Understand the importance of pain management in dental practice. Recognize that we have a choice of drugs that we can use. This course should help the participants adapt an evidence-based approach to patient management rather than use a one size fits all strategy.

- Pain and dentistry: Why, where, and how.
- What drugs do we have available?
- Opiates – What is good about them. When do we need these drugs?
- Opiates – What is bad about them.
- Legal/administrative issues with opiate prescribing in New Jersey.

Visit our website for the full course description: cde.sdm.rutgers.edu

Enteral Conscious Sedation

This course will present an update and review of physiology and physical evaluation of medically complex patients. A detailed review of the pharmacology of enteral medications and recognition and management of anesthesia complications will be presented. We will also discuss proper patient monitoring using the required monitoring equipment. Setting up a proper emergency kit and management of medical and anesthesia related emergencies will also be presented.

Objectives:
- Review the anatomy and physiology of the cardiac and respiratory system.
- Review common medical conditions and current therapeutic interventions.
- Relate medical conditions to their impact on delivery of dental services.
- Discuss patient evaluation in ascertaining relative risks in performing dental procedures under enteral sedation.
- Establish guidelines and limitations in the delivery of dental services based upon medical conditions.
- Update on the pharmacology of enteral medications.
- Recognize and manage anesthesia complications.
- Recognize and manage common medical emergencies.

Dentistry’s Missing Link;  
Periodontal Diagnosis and Treatment Planning

Over 80% of the population has some form of periodontal disease, yet practices routinely overlook periodontal treatment. Why? Primarily because doctors and hygienists are not trained to diagnose and treatment plan periodontal therapy. This course reviews in detail clinical and diagnostic factors for periodontal disease along with criteria necessary for referring cases for different forms of periodontal therapy.

Learning Objectives:

- Review all diagnostic and clinical factors essential in properly identifying periodontal disease.
- Understand what factors should be considered in referring cases to periodontal specialists and how such cases present themselves clinically.
- Learn ways to transform your practice productivity with zero additional time and investment in marketing.

Guest Speaker:
SAM SHAMARDI, DMD

Dr. Sam Shamardi earned his DMD at Tufts University, where he served as Class President for 4 years, and his Periodontal certificate at the University of Pennsylvania. He is a Diplomate of the American Board of Periodontology and Implant Surgery and practices full-time in Boston while teaching part-time at the Harvard Division of Periodontics for the last decade.

Dr. Shamardi lectures nationally and internationally on a wide array of topics including but not limited to periodontics/hygiene, hearing loss in dentistry, financial and practice management, and innovations in dentistry.

Dr. Shamardi is an established leader, educator, clinician, author, and dental entrepreneur. He has a passion for providing solutions to significant unaddressed problems for dental professionals via educational programs and his faculty position at Harvard while providing transformative changes for the periodontal health of his patients.

He has been recognized as a dental entrepreneur for his revolutionary EarAid product, has published numerous articles, and is the author of The Financial Survival Guide for Dentists.

THE FORENSIC DENTISTRY SEMINAR SERIES
HARRY ZOHN, DMD, BS, Course Director

Beginning January 4 and ending March 1, 2024
11 sessions - 2 hours each (days and times will vary)

Please see our website for the complete outline and schedule.
Often, we are presented with challenges to provide quality care for our patients in the form of rampant caries control, emergency fractures or even the need for a restoration that must be done that day. Couple these challenges with the patient’s budget restrictions, and you find yourself thinking hard about how to provide services that will accomplish a satisfactory resolution. This lecture will present a technique of using a Nanohybrid heat and pressure cured composite crown shell to rapidly fabricate a quality long term restoration. By having this procedure in your little bag of tricks, many of the day-to-day issues that you deal with in your practice can have a simple solution that fits any patient’s economic situation. This very inexpensive technique, which can be mostly delegated to your team members and fabricated in your office lab, will help solve these day-to-day issues. Using subtle variations of techniques, that our assistants are currently trained in to fabricate temporary restorations, enables these same team members to create a more permanent restoration.

**Learning Objectives:**

- Participants will be introduced to a new concept of fabrication of an in-office laboratory composite resin crown that their team can accomplish in a very short period.

- Participants will understand the many situations where the composite resin crown can help them provide their patients with a very viable lower cost alternative to their current crown techniques.

- The economic viability of a resin crown will be discussed as to how it can be a better alternative, in many instances, over a CAD/CAM restoration.

- Participants will understand the entire process from diagnosis to fabrication. They will be able to return to their practice tomorrow, ready to work with their team and delegate the creation of new solutions for their patients.

**Guest Speaker:**

**MARK MALTERUD, DDS, MAGD**

After graduating from the University of Minnesota School of Dentistry, Dr. Malterud trained at the L.D. Pankey institute, completing their entire continuum on comprehensive dentistry. He received his AGD Mastership and Lifelong Learning and Service Recognition award and currently sits on the AGD Foundation Board. He is a Fellow in the American College of Dentists and the Academy of Dentistry International.

A practicing general and family dentist, Dr. Malterud focuses on comprehensive cosmetic and general dentistry incorporating minimally invasive biomimetic dental procedures. He also consults with various other dental manufacturers on product development and testing and is a proud member of Catapult Education. His passion for dentistry has enabled him to lecture both nationally and internationally.
Restorative Decision Making for Endodontically-Treated Teeth

Restoring the pulpless tooth varies dramatically from practitioner to practitioner, with widely different results. We will review cutting-edge scientific knowledge of restoring endodontically treated teeth. You will learn when to use a simple core and when to use dowels – and explore clinical ramifications of dowel selection when it is indicated. Clinical issues are explored, and tips for success are offered to optimize the use of most dowels available today.

Dr. Sharifi's master's research included threaded, tapered, parallel, prefabricated, and custom cast dowels. The clinical implications of that research will be shared with a full clinical outline providing restorative dentists an opportunity to observe the clinical treatment from start to finish. Computer model research is summarized to support treatment recommendations.

Recent protocols for identifying endodontic failure should help to clarify the dilemma we face when determining the fate of a tooth to extraction or restoration. We will discuss the implication of root canal on the restorative success of the tooth to compare these treatment options. Dr. Sharifi will present the science that has helped us clarify where and when along the continuum the endodontically treated tooth should be extracted.

Upon completion, you should be able to:
- Have a clear understanding of implications of prefabricated and custom cast dowels.
- Consider dowel specific cements available and make a strong selection.
- Outline clinical treatment protocol from start to finish.
- Provide a simple explanation of the ferrule effect and how to maximize it.
- Understand options available to diagnose and treatment plan endodontic failure.
- Diagnose various resorptions that can occur and plan appropriate course of action.

This presentation is geared toward Endodontists and Restorative Dentists.

Guest Speaker:

M. NADER SHARIFI, DDS, MS

Dr. M. Nader Sharifi received his DDS degree from the University of Illinois at Chicago, then continued his education to earn a certificate in prosthodontics from Northwestern University Dental School. He also earned a master's degree in dental biomaterials from Northwestern University.

Dr. Sharifi is a nationally recognized dental instructor on the topics of dental implants, full and partial dentures, overall patient care, and restoring root canal-treated teeth. He has presented several hundred lectures internationally and nationally. Dr. Sharifi was named to the select American Dental Association (ADA) National Speakers Bureau in 1996. In 2007, he received the coveted Gordon J. Christensen Lecturer Recognition Award for excellence in teaching and loyalty to the profession.

Pharmacology and Internal Medicine for Dentists (SBRC)

This three-hour course should satisfy the required hours by the New Jersey Board of Dentistry.

This course will focus on the fundamentals of pharmacology and internal medicine as related to the practice of dentistry.

Training includes the appropriate use of:
- Analgesics.
- Antibiotics.
- Local anesthesia / agents to control anxiety.
- Drug (medication) knowledge and interactions.
- Prescription writing.
- Abuse of prescriptions by patients.
- Taking complete medical histories.
- The use of the New Jersey Prescription Monitoring Program (NJPMP)

Faculty:
DAVIS THOMAS, BDS, DDS, MSD, MScMed (Sleep Medicine), MSc
Clinical Assistant Professor
Department of Diagnostic Sciences
Division of Orofacial Pain

Oral Diagnosis Potpourri

This interactive, case-based program presents a broad spectrum of soft and hard tissue pathologies encountered in daily practice and provides an opportunity for dental providers to achieve a level of comfort with developing a differential list as well as a management action plan.

For each case the patient’s chief complaint is provided, as well as pertinent clinical and radiographic data. The audience is invited to participate in discussions regarding clinical categorization, appropriate description, diagnostic evaluation, and management of oral abnormalities. The presenter then discloses the diagnosis and emphasizes “clinical pearls” regarding the case management.

This program’s objectives will help you to:
- Accurately categorize oral lesions to narrow down differential diagnosis.
- Develop a prioritized list of differential diagnosis consistent with available data.
- Decide on pertinent diagnostic procedures: imaging, auscultation, vitality testing, aspiration, blood tests, biopsy, etc.
- Select an appropriate site for biopsy when indicated.
- Recognize salient histological features leading to definitive diagnosis.
- Apply the “clinical pearls” to appropriate management of cases discussed.

Presented by:
MAHNAZ FATAHZADEH, BSC, DMD, MSD
Professor and Director of the Division of Oral Medicine
Department of Diagnostic Sciences

Wednesday, October 11, 2023

ACT I: Managing the Medically Compromised

OBJECTIVES:
- Recognize patients with medical risk factors.
- Identify patients that are immunocompromised.
- Formulate strategies for managing the medically compromised.
- Understand how to manage patients on anticoagulant therapy.
- Understand how to use astringent materials to stop active dental bleeding.
- Understand how the medically compromised patient impacts dental pharmacology.

ACT II: Managing Medical Emergencies

OBJECTIVES:
- Identify patients at highest risk for medical emergencies.
- Recognize signs and symptoms of common medical emergencies.
- Develop differential diagnosis for common emergency presentations.
- Apply medical interventions to manage common medical emergencies.
- Describe use of the drugs and equipment used to manage medical emergencies.

ACT III: Managing Dental Pain in the Age of Opiate Prescription Abuse

OBJECTIVES:
- Understand the current prescription opiate abuse problem and the dentist’s role in solving this issue.
- Understand pain and advanced opiate-free pain control strategies.
- Utilize pre-emptive analgesia to control pain in dental practice.

(Please see our website for more information.)

Guest Speaker:
JOSEPH A. BEST, DDS, PhD

Dr. Best graduated from Marquette University School of Dentistry in 1989. He then did his residency at the University of Rochester School of Medicine and Dentistry in New York. He achieved a PhD in pharmacology, and then earned his certificate in oral and maxillofacial surgery. He subsequently joined as a faculty member of the University of Rochester Eastman Department of Dentistry, and then the private practice of OMSA. He currently serves on the faculty of the Marquette University School of Dentistry.

Dr. Best is a recipient of numerous awards, grants, and honors including an oral and maxillofacial surgery foundation fellowship, the AADR Hatton Award, and the Dentist Scientist Award from the University of Rochester. He has published several articles relating to his research in various professional journals, and has been invited to speak on numerous occasions at formal gatherings.

CONTINUING DENTAL EDUCATION CALENDAR

Incorporating Dental Sleep Medicine into the Dental Practice

The ADA has now recognized that the dental office is the front line in awareness of obstructive sleep apnea. A rapidly growing area of dental sleep medicine and the dentist’s role in treating this deadly disease will be discussed. This will include the most effective way for the dental team to screen their patients for obstructive sleep apnea.

This informative session will also cover various dental appliances and how to adjust each one to get the most benefit for the patient. The last part of the lecture will entail the various ways to incorporate dental sleep medicine into your practice. This would include the tools for billing and marketing so your practice can implement the start of dental sleep medicine on Monday morning.

Learning Objectives:
- Recognizing the signs and symptoms of obstructive sleep apnea.
- Communication with sleep clinicians and getting their corporation to help you achieve success.
- Understanding various dental appliances in treating sleep apnea and how they are titrated.
- A successful way to implement and grow dental sleep medicine in your practice.

Guest Speaker:

STEPHEN D. POSS, DDS, PC
Brentwood, TN

Dr. Poss obtained his dental degree from the University of Tennessee College of Dentistry in 1983. He has been in private practice for the past 40 years. For the last 6 years Dr. Poss has focused his practice entirely on Dental Sleep Medicine and TMD.

Implant-Supported Restorations in the Esthetic Zone: Challenges and Solutions

When it comes to implant-supported restorations in the esthetic zone, clinicians continue to face unique challenges that require careful consideration and planning. This lecture will cover the factors that affect the outcome of implant-supported restorations in the esthetic zone, such as tissue management, implant position, and restoration design. You will also learn about the latest techniques and materials used to achieve natural appearing restorations. Whether you are new to implant dentistry or an experienced clinician, this lecture will provide valuable insights and practical tips for achieving successful and esthetically pleasing implant-supported restorations in the esthetic zone.

Learning Objectives:
• Understand challenges and strategies for implant-supported restorations in the esthetic zone.
• Learn the latest techniques and materials for natural results.
• Explore strategies for improving the esthetic outcome of implant-supported restorations.
• Gain insight into treatment planning and case selection.
• Get practical tips and best practices for successful implant-supported restorations in the esthetic zone.

Guest Speaker:
CARLOS MOGLIANESI, DMD, FACP
Diplomate of the American Board of Prosthodontics

Dr. Carlos Moglianesi is a board-certified prosthodontist, specializing in the restoration and replacement of teeth. He graduated from the UMDNJ New Jersey Dental School in 1985 and went on to complete a two-year mini residency there, focusing on the diagnosis and treatment of orofacial pain and temporomandibular dysfunction. Additionally, he received advanced training in prosthodontics from the Wadsworth Veterans Administration in Los Angeles and was awarded a certificate for his achievements.

Dr. Moglianesi has held academic positions at several prestigious institutions including the Harvard School of Dental Medicine, UCLA School of Dentistry, and the University of Medicine and Dentistry of New Jersey. He has served as a consultant at the Lyons Veterans Hospital in Lyons, New Jersey. He is an active member of: the American Dental Association, New Jersey Dental Association, Tri County Dental Society, American College of Prosthodontics, and the American Academy of Fixed Prosthodontics.

He has presented lectures on a variety of topics including dental implant prosthodontics, esthetics, dental implants, and the digital workflow, as well as conducted numerous hands-on courses in dental implant dentistry. Dr. Moglianesi is fluent in both English and Spanish and has delivered lectures in both languages in several countries.

The Use of Botox and Dermal Fillers to Enhance Your Cosmetic Dentistry Patients

This course will provide you with a solid working knowledge of the anatomy and neurophysiology of the head and neck, pharmacology of Botulinum toxin and dermal fillers along with approved cosmetic uses. We will demonstrate how to carefully select appropriate patients, obtain informed consent, produce acceptable results, and avoid complications.

Day 1:
• Head and neck anatomy & anatomy of the aging face.
• Structure and function of the skin.
• Photo-documentation requirements.
• Psychology of the cosmetic patient.
• Patient selection and informed consent for Botox.
• Pharmacology of botulinum toxin.
• Botox and Dysport differences.
• The preparation, handling, and storage of Botox.
• Topical Anesthetics.
• Injection techniques.
• Management of the complications of Botox.

Day 2:
• Patient selection and informed consent for dermal fillers.
• Pharmacology of dermal fillers.
• Local anesthetic blocks and pain control.
• Dermal filler selection.
• Administration of dermal fillers & advanced injection techniques.
• Management of complications with dermal fillers.

Faculty:
Department of Oral and Maxillofacial Surgery
PAMELA L. ALBERTO, DMD - Course Director
Associate Professor

GUIDELINES FOR Continuing Dental Education Requirements

The New Jersey Board of Dentistry requires, for every license renewal period, 40 hours of continuing education for licensed dentists in New Jersey. This 40-hours now also includes 10 mandatory hours for Dentists (Dental Hygienists and Registered Dental Assistants have 6 mandatory hours) in the following:

1. **Cardiopulmonary Resuscitation (CPR)**, per American Heart Association certification standards. Includes use of an automatic external defibrillator (AED), unconscious and conscious choking, and rescue breathing. Training must be done in-person.
   3 hours for Dentists / 3 hours for DH & RDA

2. **Pharmacology and Internal Medicine**, includes appropriate use of analgesics, antibiotics, local anesthesia, and agents to control anxiety, drug (medication) knowledge and interactions, prescription writing, abuse of prescriptions by patients, taking complete medical histories, and the use of the NJ Prescription Monitoring Program.
   3 hours for Dentists

3. **Preventing and Controlling Infectious Diseases** and managing personnel health and safety concerns related to infection control in dental settings.
   2 hours for Dentists / 1 hour for DH & RDA

4. **Professional Ethics and NJ law concerning the practice of dentistry** and managing personnel health and safety concerns related to infection control in dental settings.
   1 hour for Dentists / 1 hour for DH & RDA

5. Educational programs or topics concerning **Prescription Opioid Drugs**, including responsible prescribing practices including responsible prescribing practices, alternatives to opioids for managing and treating pain, and the risks and signs of opioid abuse, addiction, and diversion.
   1 credit hour for Dentists / 1 hour for DH & RDA

Please visit the New Jersey Board of Dentistry website for complete details.

LIMITED ENROLLMENT

Smile Design, Bonding and Esthetic Materials Update
HANDS-ON Tooth Preparation
   Lecture & Workshop –

This presentation will present key points formulated into a systematic step-by-step approach to resolve esthetic problems with predictable results and improved laboratory support. We will also cover critical details of porcelain veneers and all-ceramic crown techniques in terms of system selection, cement and adhesive selection and bonding sequence. Occlusal management of esthetic cases will also be detailed to minimize porcelain fractures and complications:

- **Current Practice with all-ceramic crowns and porcelain veneers:** Best practical techniques for porcelain veneers and all-ceramic crowns. Fine technique details on tooth preparations with four hands-on preparations, adhesion and cement selection for lithium disilicate and zirconia restorations.

- **Materials Selection and Esthetic Treatment Techniques:** Establish a step-by-step strategy for optimum ceramic materials application (Translucent Zirconia, Lithium Disilicate and Traditional Zirconia) and maximum predictability. When it is necessary to open VDO and how to do it practically.

- **Treatment planning with workshop on treatment planning scenarios:** Learned lessons with implants, esthetic cases, management of parafunction, material selection and comparison between all-ceramic systems.

**Objectives:**

- **Fine Technique Details:** Optimize Clinical Techniques with All-Ceramic Crowns and Porcelain Veneers Treatment. Optimize preparation technique, provisionals protocol, cement selection and adhesive bonding Techniques.

- **Ceramic Materials:** How to select ceramic materials for best esthetics, control and simplicity for natural teeth and implants. When do we use lithium disilicate, translucent zirconia, or full-strength zirconia?

- **Esthetic Treatment Techniques:** Manage Key Esthetic Factors for Predictable Esthetic Treatment. Apply these for minor and major Cases.

---

**Guest Speaker:**

GERARD J. CHICHE, DDS

**DR. GERARD CHICHE** is the Thomas P. Hinman Endowed Chair in Restorative Dentistry, and the Director of the Center for Esthetic & Implant Dentistry at Augusta University, Dental College of Georgia. He has presented programs nationally and internationally and is a Past President of the American Academy of Esthetic Dentistry. He is also the author of the textbooks: Esthetics of Anterior Fixed Restorations, and Smile Design – A guide for Clinician, Ceramist and Patient, both published by Quintessence Pub. Co. He is the recipient of the 2003 LSU Alumni Award, the 2003 Award of the Seattle Study Club for best dental educator of the year and the 2007 Distinguished Lecturer Award of the Greater New York Academy of Prosthodontics. The first recipient of the Endowed Chair sponsored by the Thomas P. Hinman Dental Society (2009).

Expanding the Use of Anterior Direct Composite Restorations in Your Practice

– A Lecture & Hands-On Course –

Today, the number of aesthetic direct composite procedures continues to be on the rise. Our patients want to look better and enhance their smiles. Improved materials and technologies make it possible for all dentists to expand on the services they already provide. This lecture/participation course will demonstrate techniques to artistically restore anterior teeth with direct composite beyond what you are currently offering in your practice.

After attending this course, the participant will learn to:

• Fabricate anatomically correct direct composite veneers using Uveneer templates.
• Fabricate a direct composite bridge using glass fiber technology.
• Use a palatal matrix to simplify Class IV fractures.
• Use single shade composite systems to simplify aesthetic matches in direct anterior composite restorations.
• Understand the benefits of heated composite.

Learn how to make a real difference in your patient’s life and in your practice tomorrow!

Guest Speaker:

ROBERT A. LOWE, DDS, FAGD, FICD, FADI, FACD
Diplomate, American Board of Aesthetic Dentistry

Dr. Robert Lowe received his DDS, magna cum laude, from Loyola University School of Dentistry in 1982. He completed a one-year dental residency in restorative and rehabilitative dentistry, aesthetic dentistry, periodontics, prosthodontics, sedation dentistry, and a rotation in surgical anesthesia. He has taught restorative and rehabilitative dentistry at Loyola University and has presented continuing education each year since graduation. Dr. Lowe has maintained a full-time private practice for 30+ years and is a world-recognized clinician in the field of Cosmetic and Rehabilitative Dentistry.

LIMITED ENROLLMENT
Wednesday, October 25, 2023

Pediatric Dentistry for the General Practitioner
– HANDS-ON COURSE –

As a general practitioner, you should be able to care for most of the kids in your practice, without having to refer them out to the pediatric dentist across town. Taking care of your kids should be fun and stress free. Learn how with the most up to date methods and techniques for intra-coronal restorations, primary dentition full coverage, pulpotomies and more. Step-by-step instructions will be provided to help you become a superstar with the kids and parents in your practice.

As Benjamin Franklin said, “Tell me and I forget, teach me and I may remember, involve me and I learn” In this course, you will be involved. You’ve heard it before - treat your kids well and your practice will soar.

Course Objectives:
• Learn efficient reliable pediatric methods and techniques.
• Effectively treat anterior and posterior primary dentition decay.
• Successfully diagnose and treat pulpally involved teeth with new materials.

Presented by:
CARLA COHN, DMD
Winnipeg, Manitoba / Canada

Dr. Carla Cohn is a general dentist, devoted solely to the practice of dentistry for children. She graduated from the University of Manitoba in 1991 and then went on to complete a post-graduate internship in Paediatric Dentistry. Since then, she has devoted herself to the care and treatment of children only.

Dr. Cohn maintains a private practice at Kids Sleep Dentistry and Kids Dental, both in Winnepeg, Canada. She is a partner and has surgical privileges at Western Surgery Centre, a private surgical clinic. In addition to private practice, she is a part-time clinical instructor in Paediatric Dentistry at her alma mater, Gerald Niznick College of Dentistry at the University of Manitoba.

A Comprehensive
Hands-on Training Program
IN IMPLANT DENTISTRY

September 2023– June 2024

Ten Friday to Sunday Modules
8:00 a.m. to 5:00 p.m. each day
At the Rutgers School of Dental Medicine

Tuition: $16,275 – Register by August 15, 2023
$17,275 – Register after August 15, 2023

This program has been designed to impart the understanding of diagnostic and treatment modalities necessary to properly treat patients who are candidates for dental implant therapy. The 300-hour interdisciplinary approach utilizes case-based learning methodology including lectures, demonstrations, interactive seminars, hands-on sessions, patient treatment, and relevant reviews of literature emphasizing evidence-based clinical approaches.
